PRESS RELEASE / COMMUNIQUE

Focus on Sickle Cell Foundation (FoSCel)

As part of our activities marking World Sickle Cell Day, the Focus on Sickle Cell Foundation (FoSCel) partnered with the National Health Insurance Authority (NHIA) to advocate for improved healthcare access for persons living with sickle cell disease.

FoSCel introduced a policy proposal for free sickle cell treatment under the National Health Insurance Scheme (NHIS). We are pleased to announce that the NHIA officially recognized this initiative and published it on their website and Facebook platform.

Today, we are proud to confirm that the Government of Ghana has implemented this policy through the NHIS, making sickle cell treatment free for patients nationwide.

This milestone is a testament to what strong advocacy and collaboration can achieve. We remain committed to further engagements with stakeholders to ensure that persons living with sickle cell continue to receive the best possible support.

Yours sincerely,

Amos Andoh
