

GHANA WATER LTD

PRESS RELEASE

To: All Media Houses

FOR IMMEDIATE RELEASE

DATE: 11TH DECEMBER 2025

TECHNICAL CHALLENGES AT BAREKESE WATER TREATMENT PLANT

The Management of Ghana Water Ltd (GWL), Ashanti Region, wishes to inform the public and its cherished customers that the Barekese Water Treatment Plant is currently experiencing technical challenges following a blast that occurred at the high-lift section of the plant. This incident has also affected one of the three pumps in operation, thereby reducing the water flow and pressure to the city.

Engineers of GWL are working tirelessly to ensure the pump is repaired as soon as possible to normalize the flow and pressures in the distribution network. However, the technical team is managing the available volume to enhance the flow and pressures to better serve our customers adequately.

We understand the importance of a reliable water supply and are committed to resolving this issue as quickly as possible.

Management sincerely apologizes for the inconvenience this situation has caused and appreciates your understanding and patience as we work to resolve these technical challenges. We are dedicated to ensuring that our customers receive the water services they deserve.

END.
